

Intralogistics Fleet Management

*We do it.
Safe and efficient.*

Our System – your most important benefits

- ✓ Access control, individually per user, per device
- ✓ Decreasing accident rates, up to – 50%
- ✓ Legally compliant operation
- ✓ Secure, regularly maintained and tested equipment
- ✓ Easy handling of all processes
- ✓ 6-fold data protection, GDPR-compliant
- ✓ No tool to monitor employee performance

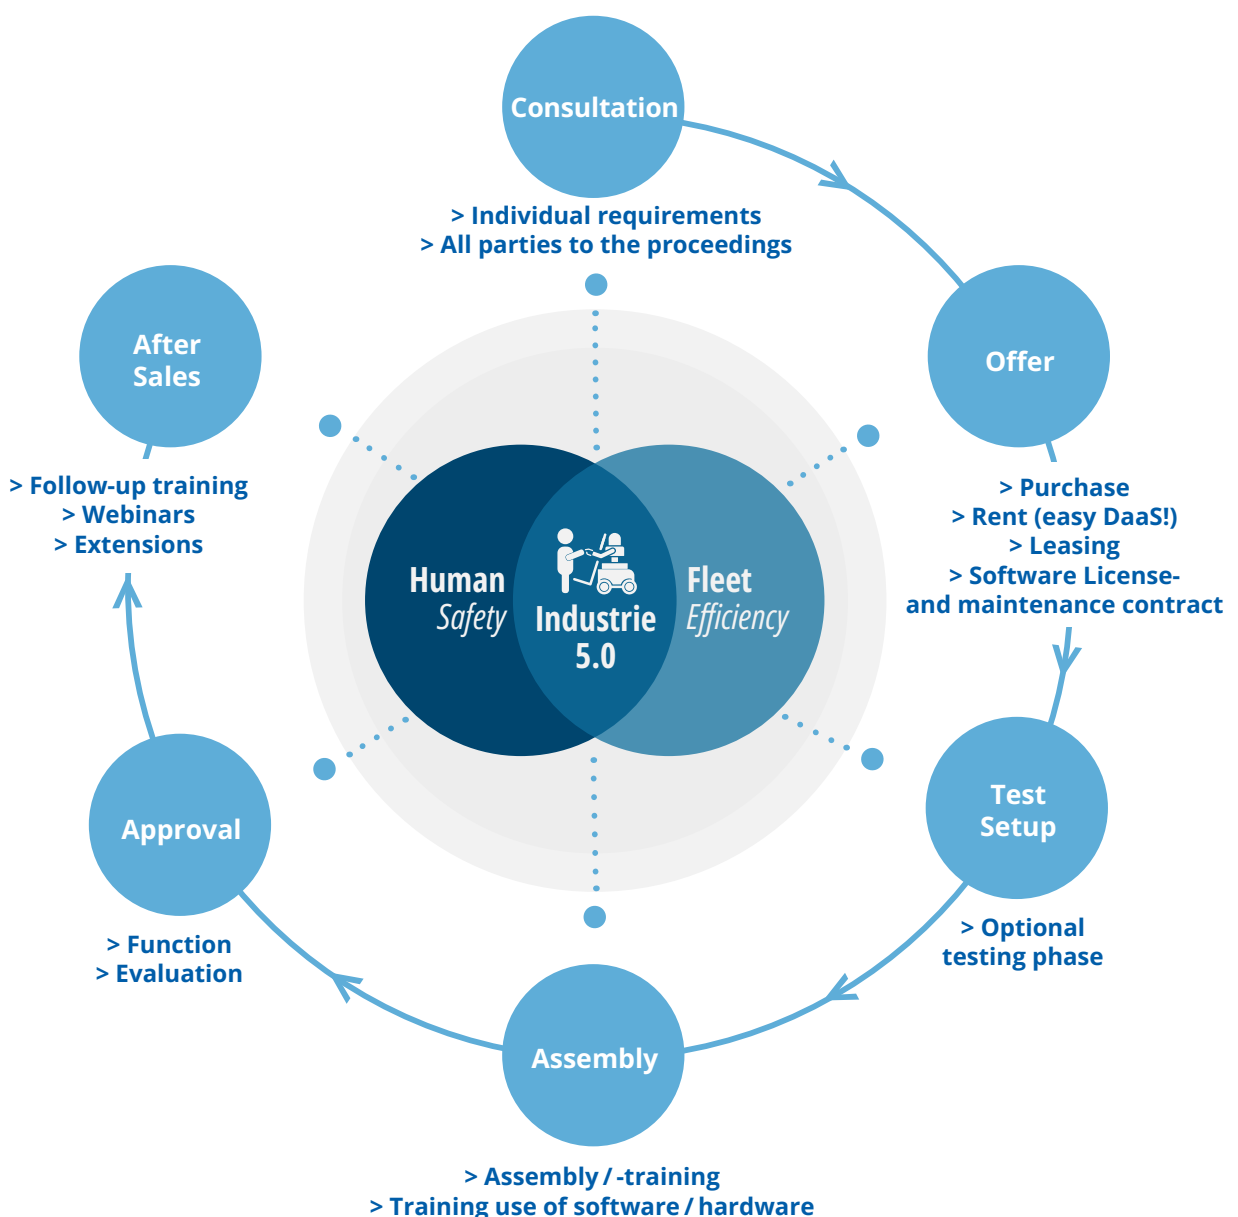

Industry 5.0: Mobile Easykey is used wherever people will continue to play an important role in variable processes in the future. The introduction of the system immediately leads to a more prudent handling of industrial trucks. Accidents and damage are proactively avoided.

- ✓ Reduction of the fleet, up to – 15%
- ✓ Decreasing number of accidents: lower repair costs
- ✓ Less peripheral damage
- ✓ Reduced wear and tear
- ✓ Avoidance of unnecessary maintenance
- ✓ Reduced battery wear and tear
- ✓ Leasing costs remain within limits
- ✓ Energy saving on combustion engines

Within a very short time, you can see which and how many forklifts you really need. And the careful handling of industrial trucks and batteries also contributes to a significant reduction in intralogistics costs.

By the way, the Mobile Easykey system itself is also designed for *cost savings and sustainability*
➔ see next page.

Get started with an individual consultation – the easy implementation of Mobile Easykey

Our System – the most important facts

- ✓ Manufacturer-independent
- ✓ Incorruptible data supplier
- ✓ Easy to implement
- ✓ Suitable for any device, any machine
- ✓ No interference with the CE
- ✓ Can also be ordered ex works

Cost savings and sustainability

- ✓ Fast amortization
- ✓ Durable products, convertible when changing devices
- ✓ Modular design: needs-based solutions

We modulate the system to meet your requirements – flexible and simple!

Our modular, manufacturer-independent system – the features of the product kit

SOFTWARE

MEKM
MEKM smart

HARDWARE

SMART LOCK 1
SMART LOCK 3
MODULAR
EX-PROTECTION MODULE
COLD STORAGE VERSION

Data, data, data!

Mobile Easykey provides the most and the best data on the market! These are collected, combined and processed in the Mobile Easykey Manager (MEKM). The software is secure, GDPR-compliant, it meets the VDI 4458 standard and all data stays with you – instead of in any cloud. For pure access control, there is the MEKM smart version, which is used in conjunction with the smart lock 1 module.

Key Features

- ✓ The most and the best data – manufacturer-independent, neutral
- ✓ Comprehensive statistics and analysis
- ✓ Mapping of the complete corporate structure
- ✓ FFZ-KPI: Efficiency at a glance
- ✓ Vehicle management
- ✓ User management
- ✓ Document management
- ✓ Training management
- ✓ Alarm control panel with traffic light system
- ✓ Automated e-mail dispatch for events and reminders
- ✓ Automated backups
- ✓ Data import or export via CSV or REST-API
- ✓ Option Package 1: Finance and (advanced) statistics
- ✓ Option Package 2: Indoor and Outdoor Locator
- ✓ Option: Software license- and maintenance contract

Hardware and Data Transmission

As a rule, only the Mobile Easykey module and any presence detection system installed on the vehicle are visible to the operator. The module is used for RFID access control.

The Mobile Easykey- or the VDI interface ensure faster implementation. With many manufacturers, the interfaces can already be ordered ex works. The data is transmitted to the software via Infrared cable (smart lock 1) or wireless via Wi-Fi, Bluetooth or mobile/GPS transmission.
